

# RESILIENT REALISM: “CIRCULAR ECONOMY: RESTORING ECONOMIES AND COMMUNITIES”

LINKCO

This summary of the Resilient Realism Webinar is authored by LINKCO. With twenty plus years of broad executive business experience, LINKCO is well situated to reach out to leaders. The webinar for this Summary took place on July 8th, 2020 with Scott Valentine, KPMG.

Based in Southern California, LINKCO is an Executive Search and Consultancy serving top Middle Market CXO and upper management clients and candidates throughout the USA.

## Resource Productivity:

- Refuse and Reuse are the golden goals, this means we are using less resources.
- Recycling is a less efficient means of using resources, because every step of the recycling process has hidden and other costs.

Integrated circular economy transitions corporations to be globally sustainable by better using available resources and maximizing business productivity.

Circular economy virtualization and sharing of resources minimizes raw material input and waste generation. For example, this was seen in Kalundborg Symbiosis in Denmark.

For the circular economy to succeed a poly centric policy approach with varied initiatives on the business, municipal and national level will help advocate for change.

Current opportunities include companies optimizing resource use.

Contact LINKCO to learn more about the challenges and opportunities highlighted in the White Paper. Let us help you build a more resilient workforce ready for the future.
